Look and Learn

Every page of this book is designed such that the child learns using the visuals on the page and the words associated with the visual.

Every page has **three(3)** new words that the child will learn.

The Parent/ Teacher is encouraged to read the pages and explain the visual for better understanding.

About AcumenToday

For an overall development of the child in early years, the LSRW (Listen, Speak, Read & Write) method of learning is age old, but is still relevant in modern days of today – our book is an attempt towards building the age-appropriate motor skills, cognitive skills, language skills, mathematic / arithmetic skills and most importantly the age-appropriate behavior, values, character, attitude, aptitude and knowledge.

We have designed these early Learning books keeping in mind the development of **Motor** and **fine motor** skills through activities and build abilities and all-important lifelong skills of cooperation, teamwork, social interaction, compassion, equity, inclusiveness, communication, cultural appreciation, playfulness, curiosity, creativity, as well as the ability to successfully and respectfully interact with teachers and elders.

The learning preferences, styles, process and methods are different for every child wherein each child sees, hears and understands things differently.

The way each child listens, speaks, reads, writes and grasps varies from child to child. Skills such as math, reasoning, logic and thinking also differs.

While going to an early childhood care and education, the child will improve in foundational literacy, foundational numeracy and the necessary abilities and skills as needed for lifelong learning.

We have brought about an **Integrated- Interrelated- Interconnected approach (3i)** towards all the subjects of **English, Mathematics** and **General Awareness**.

The colorfully illustrated activity-based books aim at teaching various skills and concepts in a well-graded and thematic manner. Each book has a number of activities and practice task to develop age-appropriate skills.

Key Features: Scientifically arranged lessons, Simple and easy-to-understand activities, Colourful and child-friendly illustrations Ample writing practice with the help of fun activities.

While we focus on Today, our goal is that for the future of every child
